

## List of Publications

Jürgen Prestin

1. H.-D. O. F. Gronau, J. Prestin, Some results on designs with repeated blocks, Rostock. Math. Kolloq. **21** (1982), 15-37
2. J. Prestin, M. Tasche, Fourier operational calculus, Serdica **9** (1983), 309-320
3. J. Prestin, Trigonometric interpolation of functions of bounded variation, in: Constructive Theory of Functions (Proc. of the Intern. Conf. on Constr. Theory of Functions, Varna 1984, Ed. B. Sendov) Sofia 1984, 699-703
4. J. Prestin, Trigonometrische Interpolation von Funktionen beschränkter Variation, Math. Nachr. **122** (1985), 29-43
5. J. Prestin, On the approximation by de la Vallée Poussin sums and interpolatory polynomials in Lipschitz norms, Analysis Math. **13** (3) (1987), 251-259
6. J. Prestin, Best approximation in Lipschitz spaces, in: Coll. Math. Soc. Jan. Bolyai 49: Alfred Haar Memorial Conf. (Eds. J. Szabados, K. Tandori) Budapest Jan. Bolyai Math. Soc. 1987 and Amsterdam-Oxford-New York: North Holland Publ. Comp. 1987, 753-759
7. J. Prestin, Trigonometric interpolation in Hölder spaces, J. Approx. Theory **53** (2) (1988), 145-154
8. J. Prestin, Trigonometric approximation by Euler means, in: Constructive Theory of Functions (Proc. of the Intern. Conf. on Constr. Theory of Functions, Varna 1987, Ed. B. Sendov) Sofia 1988, 382-389
9. J. Prestin, Über die Approximation durch trigonometrische Polynome in Lipschitz Normen, in: Extremalaufgaben, Funktionalanalysis und ihre Anwendungen (Hrsg. P. L. Uljanov, V. M. Tichomirov) (russ.) Izd. Moskov. Univ. 1988, 45-48
10. J. Prestin, Approximation in periodischen Lipschitzräumen, Rostock. Math. Kolloq. **35** (1988), 77-78
11. J. Prestin, Mean convergence of Lagrange interpolation, in: Seminar Analysis, Operator Equat. and Numer. Anal. 1988/89, Karl-Weierstraß-Institut für Mathematik, Berlin 1989, 75-86
12. J. Prestin, M. Tasche, Trigonometric interpolation for bivariate functions of bounded variation, in: Approximation and Function Spaces, Banach Center Publ., Vol. 22, PWN, Warsaw 1989, 309-321
13. J. Prestin, S. Pröbldorf, Error estimates in generalized trigonometric Hölder-Zygmund norms, Z. Anal. Anwend. **9** (4) (1990), 343-349
14. T. Kilgore, J. Prestin, On the order of convergence of simultaneous approximation by Lagrange-Hermite interpolation, Math. Nachr. **150** (1991), 143-150

15. J. Prestin, Periodic spline interpolation of functions of bounded variation, in: *Curves and Surfaces*, (Eds. P. J. Laurent, A. Le Méhauté, L. L. Schumaker) Academic Press, New York, 1991, 383-386
16. J. Prestin, Best approximation and interpolation in algebraic Hölder norms, in: *Coll. Math. Soc. Jan. Bolyai 58: Approximation Theory*, Kecskemét 1990, (Eds. J. Szabados, K. Tandori) Budapest Jan. Bolyai Math. Soc. 1991 and Amsterdam-Oxford-New York: North Holland Publ. Comp. 1991, 583-590
17. J. Prestin, E. Quak, On interpolation and best one-sided approximation by splines in  $L^p$ , in: *Approximation Theory*, (Ed. G. Anastassiou). *Lecture Notes in Pure and Applied Mathematics Vol. 138* (1992), 409-420
18. J. Prestin, Lagrange interpolation for functions of bounded variation, *Acta Math. Hung.* **62** (1-2) (1993), 1-13
19. J. Prestin, Lagrange interpolation on extended generalized Jacobi nodes, *Numer. Algorithms* **5** (1-4) (1993), 179-190
20. J. Prestin, Mean convergence of derivatives of extended Lagrange interpolation, *Suppl. Rend. Circ. Mat. Palermo II. Ser.* **33** (1994), 427-437
21. J. Prestin, Y. Xu, Convergence rate for trigonometric interpolation of non-smooth functions, *J. Approx. Theory* **77** (2) (1994), 113-122
22. J. Prestin, E. Quak, A duality principle for trigonometric wavelets, in: *Wavelets, Images and Surface Fitting*, (Eds. P. J. Laurent, A. Le Méhauté, L. L. Schumaker) AKPeters, Boston, 1994, 407-418
23. J. Prestin, E. Quak, Decay properties of trigonometric wavelets, in: *Proceedings of the Cornelius Lanczos International Centenary Conference*, (Eds. J. D. Brown, M. T. Chu, D. C. Ellison, R. J. Plemmons) SIAM, Philadelphia, 1994, 413-415
24. T. Kilgore, J. Prestin, A theorem of Gopengauz type with added interpolatory conditions, *Numer. Funct. Anal. Optimization* **15** (7-8) (1994), 859-868
25. J. Prestin, F. Sprengel, Multivariate trigonometric wavelet decompositions, *Comput. Math. Appl.* **30** (3-6) (1995), 169-182
26. J. Prestin, E. Quak, Trigonometric interpolation and wavelet decompositions, *Numer. Algorithms* **9** (3-4) (1995), 293-317
27. J. Prestin, K. Selig, On the Gram matrix of translates of de la Vallée Poussin kernels, *Rostock. Math. Kolloq.* **49** (1995), 105-114
28. J. Prestin, E. Quak, Time frequency localization of trigonometric Hermite operators, in: *Approximation Theory VIII, Vol. 2: Wavelets and Multilevel Approximation* (Eds. Charles K. Chui, Larry L. Schumaker) World Scientific Publishing Co. 1995, 343-350
29. T. Kilgore, J. Prestin, Polynomial wavelets on the interval, *Constr. Approx.* **12** (1) (1996), 95-110
30. T. Kilgore, J. Prestin, K. Selig, Orthogonal algebraic polynomial Schauder bases of optimal degree, *J. Fourier Anal. Appl.* **2** (6) (1996), 597-610

31. T. Kilgore, J. Prestin, Pointwise Gopengauz estimates for interpolation, *Ann. Univ. Sci. Budap. Rolando Eötvös, Sect. Comput.* **16** (1996), 253-261
32. H. N. Mhaskar, J. Prestin, On a choice of sampling nodes for optimal approximation of smooth functions by generalized translation networks, in: *Artificial Neural Networks*, 7-9 July 1997, Conference Publication No. 440, IEE, 1997, 210-215
33. J. Prestin, F. Sprengel, An orthonormal bivariate algebraic polynomial basis for  $C(I^2)$  of low degree, in: *Multivariate Approximation: Recent Trends and Results* (Eds. W. Haußmann, K. Jetter, M. Reimer) *Mathematical Research*, Vol. 101, Akademie-Verlag, Berlin 1997, 177-188
34. K. Bittner, C. K. Chui, J. Prestin, Multivariate cosine wavelets, in: *Multivariate Approximation and Splines*, (Eds. G. Nürnberger, J. W. Schmidt, G. Walz), ISNM 125, Birkhäuser, Basel 1997, 29-43
