

Workshop on Modeling, analysis, and approximation theory toward applications in tomography and inverse problems

August 20 - 21, 2018, Berlin, Germany

The workshop welcomes mathematical topics around photoacoustic tomography and related themes, in particular from modeling, analysis, and approximation theory.

The workshop is part of a trilateral partnership between scientists from Ukraine, Russia and Germany founded by VolkswagenStiftung, but it is not restricted to.

Talks and posters are welcome.

Registration until July, 20, 2018
